LEARNING FOR A SUSTAINABLE FUTURE

is a Canadian charitable organization founded in 1991 to promote, through education, the knowledge, skills, values, perspectives, and practices essential to a sustainable future.

Working with business, governments, school boards, universities, communities, educators, and youth from across Canada, LSF acts as a connector, a resource, and a facilitator for change.

LSF's innovative programs and strategic partnerships are reshaping education policy and transforming learning methods, helping students address the increasingly difficult economic, social, and environmental challenges of the 21ST century. This learning process is referred to as education for sustainable development (ESD).

When the United Nations declared the Decade of Education for Sustainable Development, from 2005-2014, LSF was well positioned to serve as a Canadian partner for the delivery of Canada's response to the Decade.

OUR TEAM

LSF's team is comprised of a strong Board of Directors, experienced staff and consultants from across the country, and graduate and undergraduate researchers from leading Canadian universities.

OUR REACH

In 2012, LSF reached over 275,000 Canadians through our programs.

THE SECRET TO OUR SUCCESS

LSF believes that building comprehensive programs starts with a solid base. LSF's core program strengths are:

- 1 Advancing Education Policy, Standards and Good Practice**
- 2 Reorienting Teaching and Learning**
- 3 Fostering Sustainable Communities - Linking Education to Action**
- 4 Supporting Joint Initiatives, Networks and Champions**

MESSAGE FROM THE CHAIR + EXECUTIVE DIRECTOR

**DR. DAVID
V.J. BELL**
CHAIR

**MS. PAMELA
SCHWARTZBERG**
EXECUTIVE DIRECTOR

Over the past two decades, LSF has worked with business, government and civil society to inform policy in the areas of responsible citizenship, education for sustainable development (ESD), and transformative learning strategies.

Educating for active responsible citizenship is necessary to a sustainable future. This is why 2012 marked a year of efforts by Learning for a Sustainable Future (LSF) to educate and inspire Canadians on the importance of civic engagement. This year, LSF hosted a series of Round tables to address what children and youth need to know, do, and value in order to ensure they are responsible, active, and contributing citizens; and how formal education can be reoriented to meet these goals. The LSF Youth Round table on Responsible Citizenship issued an impressive response, a “call to action” by youth, in the form of an online sharing platform entitled the *Our Canada Project*.

LSF’s focus on youth engagement is most evident through our EcoLeague™ and Project FLOW™ programs, which, in 2012, supported over 150,000 students in 269 schools to engage in a sustainability action project. Action projects empower students to get involved and make a positive change in their school and community. However, the role of such active and engaged students would not be possible without teachers who act as transformative educators in their students’ lives. LSF engaged over 55,000 educators in 2012 providing them with the training, resources, and programs to integrate ESD into the classroom, and beyond.

As an active Canadian partner for the delivery of Canada’s response to the United Nations Decade of Education for Sustainable Development, LSF has been invited to the UN in Geneva, Switzerland, to share our successes in imbedding

ESD into education in Canada. At this event, Learning for a Sustainable Future will highlight our impressive journey, and growing passion, in engaging hundreds of thousands of Canadians in sustainability education, active and community learning, and responsible citizenship, since 1991.

As we move forward, we continue to develop new partnerships to implement strategic activities and grow our reach across Canada. This includes expanding our resource database, R4R, for teachers which now hosts some 1,000 peer reviewed, curriculum-matched lesson plans and children’s books. We also continue to sustain and build relationships with provincial and federal governments, including Ministries of Education across the country. We are developing new partnerships with other non-government organizations to co-brand teacher resources and co-deliver teacher workshops.

We believe there are many opportunities to continue to engage citizens in thinking and acting responsibly, today, and for generations to come. We would like to thank all of the members of the LSF team, as well as our partners, sponsors, and donors, who make all of our success possible.

We hope that you will continue with us on this journey toward a sustainable future, for our Earth and our children are precious.

1 ADVANCING EDUCATION POLICY, STANDARDS AND GOOD PRACTICE

MEETINGS HELD WITH MINISTERS OF EDUCATION, DEPUTY MINISTERS AND/OR SENIOR MINISTRY STAFF IN AB, SK, MB, ON, PE, AND NS.

Advice to Ministries of Education

A major focus of LSF's work involves research and collaboration to advance education policies, standards and good practice. LSF advises Ministries of Education on policy and curriculum development using ESD as a lens through which all education must be viewed.

WORKSHOPS, ONLINE SEMINARS, AND SUPPORT FOR COLLABORATIVE LEARNING TEAMS

700 TEACHERS, TEACHER CANDIDATES, FACULTY OF EDUCATION COURSE DIRECTORS AND MINISTRY OF EDUCATION STAFF PARTICIPATED

Professional Development

Educating for active responsible citizenship requires a reorientation of teaching and learning - moving from education for employment to education for responsible citizenship, from information transfer to the search for and analysis of information, from textbook learning within the walls of the classroom to real world learning in the community.

LSF'S KEY TEACHER RESOURCES:

- » *Connecting the Dots* resource outlines the 7 key transformative learning strategies for embedding ESD into the classroom.
- » *Engaging Students in Sustainability Action Projects (ESSAP)* provides teachers with activities and methods on how to motivate their students to undertake an action project.

40 MEMBERS OF THE ESD CANADA EXPERT COUNCIL

Education for Sustainable Development (ESD) Canada

In response to the UN Decade of Education for Sustainable Development, LSF established Education for Sustainable Development (ESD) Canada. The ESD Canada Expert Council is comprised of leaders from the public, private and civil society sectors across Canada who collaborate to support the UN's call for systemic change toward ESD.

Provincial and Territorial ESD Working Groups and Regional Centres of Expertise engage leaders to support the regional advancement of formal, non-formal and informal ESD.

ESD Whole Schools

ESD Whole Schools use sustainability as an integrating context for teaching and learning, decision-making, civic engagement, community partnerships, and campus practices.

LSF Ambassadors

Undergraduate and graduate students from Faculties of Education and Environmental Studies act as LSF Ambassadors to deliver workshops and showcase LSF programs at fairs and conferences.

Symposia, Round tables and Gala Events

LSF convenes symposia and round table discussions engaging stakeholders and key decision-makers from across Canada to address "what's worth knowing" about various sustainability issues and how to encourage policy development and curriculum changes in these areas.

In the spring of 2012, in partnership with Deloitte, LSF hosted four round table discussions on preparing youth for 21ST century responsible citizenship. These round tables engaged stakeholders from government, education, business, and community, as well as youth, to address the role of education in strengthening responsible citizenship.
