

October	November	December	January	February	March
<ul style="list-style-type: none"> • Do some of the "why care" activities from the "Mining the Carbon" kit. • Conduct baseline audits of electricity use at school and home using this Electricity Audit Tool by October 29th • Once the school and home baseline audits data is entered online, each student will receive 3 compact fluorescent light bulbs to take home! The class will also receive 5 power bars to use at school. These will help you with saving electricity at both school and home. 	<ul style="list-style-type: none"> • You will use the Kill-a-Watt meters to test the electricity use of different devices. This information will help you to determine where electricity is being wasted/saved, and allow you to brainstorm innovative and effective ways of reducing electricity use. • Take actions at home and school to reduce your electricity use. • You may conduct follow-up audits periodically to determine the effectiveness of your interventions. 	<ul style="list-style-type: none"> • Take more actions to further reduce your electricity use at school and home. • Continue to conduct follow-up audits periodically to determine the effectiveness of your interventions. 	<ul style="list-style-type: none"> • Take more actions to further reduce your electricity use at school and home. • Conduct your final home and school electricity audits by January 28th, 2011 	<ul style="list-style-type: none"> • By February 1st, 2011 enter the data online. • Each teacher who has their class input the school and home follow up data is eligible to receive a free issue of Green Teacher Magazine. • Students who have entered their follow-up data online become eligible for prizes. Please see the "Prizes" tab for all of the details 	<ul style="list-style-type: none"> • Winners will be announced March 1st, 2011 - Please see the "Prizes" tab for full details.
